COMPLETE END-TO-END ASSET MANAGEMENT SYSTEM

ASSET - ONE

A reliable and premier asset management solution that captures the movement of assets. The transactional handover, in which assets are lost, is completely controlled by this module.

Thus, ensuring to achieve maximum revenue returns and the best possible service to users. It also provides complete visibility into the performance of equipment, inventory, real-time data on sales and repair. ASSET-ONE offers a holistic view of the entire supply chain.

ASSET VISIBILITY

Tracks assets in warehouses, vehicles and on-sites. This brings operations together with management inventory, repairs, spares management and reporting.

INFORMATION AVAILABILITY

The solution makes asset information available to all personnel involved in the network, engineering, logistics, finance, and planning.

COMPREHENSIVE ASSET MANAGEMENT

It is fully compatible with the PROJECT-ONE solution and focuses on managing the network assets through the entire product life cycle.

PROJECT MANAGEMENT AND ASSETS INTEGRATION

By integration with the project management suite, all data links can be customized to match the customer's internal systems ensuring that the data is consistent on all platforms through which it can be received.
