NEXSYS-ONE
SOFTWARE SOLUTIONS

ADVANCED, CUSTOMIZABLE DEPLOYMENT PLATFORM

PROJECT - ONE

It is a powerful, advanced, and highly customizable end-to-end deployment platform at the center of all operations. With a built-in full suite of project management modules, it helps users have easy, quick, and complete visibility of all aspects of renewable energy projects.

The ADMIN-ONE self-administration module is included with every PROJECT-ONE package and that allows project team administrators to manage the project configuration without the need for additional development.

SELF-ADMINISTRATION

It enables administrators to create and manage projects and reports. Plus, the module aligns them with your business rules to deliver the most complex processes.

DOCUMENTATION MANAGEMENT

It helps users with documentation management, which includes document upload, revision tracking, and approvals.
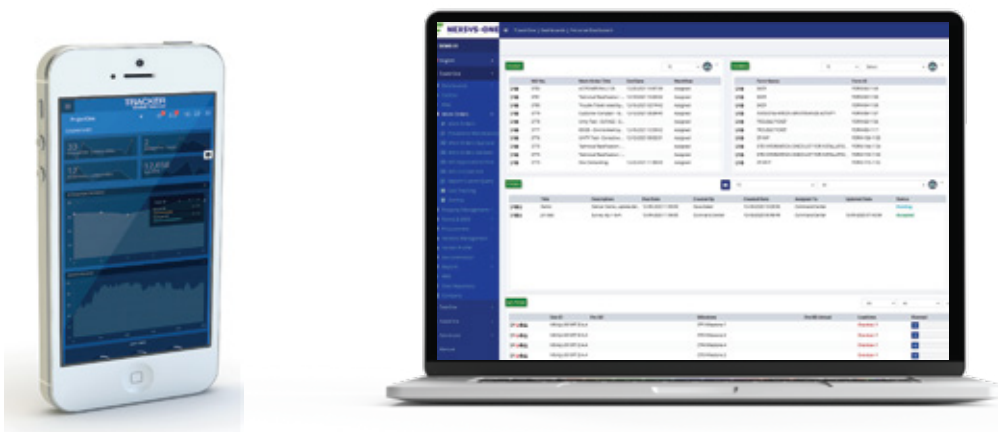

MOBILE COMPATIBLE

The PROJECT-ONE mobile app provides essential project information on the go. The module also supports offline features for creating and filling forms, and surveys, completing quality audits, and work orders.

DATA INTEGRITY

Capabilities built into the module allow the automation of related milestones as well as mass updates. Thus, it saves time, reduces handoffs between groups, and improves overall data quality.

PLATFORM FEATURES
